Casablanca, Morocco
github.com/dlimiyassin

I am a full stack developer with a strong focus on backend development using Java and Spring Boot, and experience in frontend technologies like Angular. I'm also knowledgeable in Agile methodologies. I am autonomous, a fast learner, and passionate about embracing challenges and continuously expanding my skills.

EXPERIENCE

Atlas Service | Freelance |

Sept 2024 - Present, Remote

- Collaborating with clients to develop and maintain backend APIs using Spring Boot.
- Developing Angular components and debugging frontend issues based on customer feedback during regular progress meetings.

UIR | Technical internship |

March 2024 - September 2024, In Rabat

- Implemented REST APIs with Spring Boot by applying standards and best practices, including SOLID principles and debugging as needed & Created unit tests with JUnit.
- Developed with Angular, including debugging and resolving customer reported issues.
- Built and designed responsive user interfaces with Tailwind-CSS based on Figma designs.
- Participated in daily meetings, sprints and contributed to Agile project management with Jira.

Training Edge Consulting | Technical internship |

Oct 2023 - Feb 2024, In Beni Mellal

- Participated in building a web application from scratch to streamline employee management.
- Enabled exam-based evaluations to track and support professional development within the company.

PROJECTS

- Atlas-Service:** A CRM system to track seller's arrivals from China, confirm orders in Middle East and Africa, and manage users including sellers, inventory staff, delivery personnel, agents, and managers.
 - JIT-Pilot:** A project management tool that implements the Scrum framework to manage IT projects.
 - UIR-SHOP:** An e-commerce platform for UIR students to do local sales within the university.
 - ONCF-HR:** Streamline employee management by enabling exam-based assessment of professional.
 - E-Learning:** An LMS as my Bachelor's graduation project (PFE), where the admin manages users, Teachers manage courses and exams, and Students watch courses and take basic-level exams.
- **Technologies:** Spring – Angular – Git – Docker – MySQL – PostgreSQL – Tailwind-CSS – Bootstrap...
